OAKWOOD GENETICS

ASBV PERFORMANCE

Oakwood has the highest performance Suffolk flock, is the number two White Suffolk flock and the 2017 Poll Dorset sires are in the elite of the breed.

COLD TOLERANCE

Nearly all the Lots for sale have the highest rating for cold tolerance and lamb survival which is passed through to their progeny.

Given that the weight of meat produced each year is more dependent upon the number of lambs that survive to weaning than upon the individual performance of lambs, selecting rams for lamb survival should be included in all breeding programmes.

Lamb losses and lower gross returns can be significant as a result of a cold snap.

Tenderlamb Ram TM

Oakwood has registered the trademark to promote rams that will produce tender lambs.

Based on ASBV for Shearforce SF5, these rams are in the top 10% of all terminal breeds for tenderness.

Tenderlamb Rams will not affect dressing percentage as intra-muscular is not included.

Of the rams for sale 56 are Tenderlamb Rams TM.
