

OAKWOOD

Suffolks and White Suffolks

CAPPED PRICE AUCTION

Thursday 29th September

Commencing 11.00am

Naracoorte Showgrounds

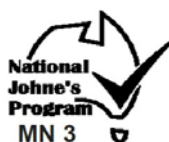

Offering

9 STUD SUFFOLK RAMS

4 STUD WHITE SUFFOLK RAMS

20 WHITE SUFFOLK FLOCK RAMS

50 SUFFOLK FLOCK RAMS

AGENTS: LANDMARK

Richards Jennings M: 0428 616 554

P: 08 8762 1200

6% rebate to outside agents introducing buyers
and attending the sale

BACKGROUND

The original Oakwood property located at Penola was purchased by my grandfather in 1918. Since 2004 Oakwood has made its home-base at Oakbank in the Adelaide Hills. I have been breeding registered livestock for over 40 years and now have Oakwood Suffolk and Oakwood White Suffolk's. The Oakwood breeding operation is being relocated to Poolaijelo, Victoria where 1460ha of land is being reverted from blue gum plantations to grazing land.

Our breeding programme for Oakwood includes mating 140 Suffolk ewes and 240 White Suffolk ewes to selected young stud rams and selling all ram progeny and a number of ewes each year at our annual sale.

All the best with your purchases.

Duncan Young

The Oakwood Suffolk Flock No 2215

Oakwood Suffolk Stud was founded in 2011. The foundation Suffolk ewes have come from leading Suffolk studs that have dispersed in recent years including Burwood (*F 28 founded 1923*) and Broughton Lodge (*F 113 founded 1939*). These include the purchase of the Australian record prices for Suffolk ewes of \$2500 and \$3100 and also a 5 month old ram lamb GlenCraig 150406 for a record price of \$11000 at the GlenCraig Suffolk Stud dispersal (*F2045 founded 1996*).

Of the 1403 Suffolk sires on Lambplan, Oakwood own and/or have bred 4 of the top 5 Suffolk sires and are currently using 3 of them.

Oakwood White Suffolk Flock No 837

The Oakwood White Suffolk Stud was founded in 2012

White Suffolk foundation ewes have been purchased from the Burwood (*F 34 est 1985*) dispersal and Detpa Grove (*F 43 est 1981*) production sales. At the Wheelandale (*F190 est 1992*) dispersal, 116 ewes were purchased based on the inspection and the performance of their progeny. These ewes were then joined for the 2016 lambing season to Farrer 140188 purchased for \$17000, Farrer 140078 \$11000 and Farrer 140019 \$8000. These sires are currently ranked in the top 20 White Suffolk Sires in Australia on the LEQ index.

Of the 2016 drop of lambs 82% have a carcass + rating over 200 index.

AVERAGE LAMBPLAN ASBV'S FOR OUR CURRENT WHITE SUFFOLK TERMINAL SIRES FOR THE 2016 AND 2017 DROP

Sale Information

ANIMAL HEALTH

Ovine Johnes Disease status: MN3 - Certificate No S421. Expiry 31.5.2017

Ovine Brucellosis Accredited Free - Certificate No 312. Expiry 31.12.2016

Suffolk stud rams - Spider tested free.

White Suffolk Specially Selected rams - Hypotrichosis tested free.

National Vendor Decs and National Sheep Health Statements will be available from the agents at the settlement desk.

All rams drenched with Startect and 5 in 1 plus selenium vaccinated on 17.8.16.

All rams have been flushed with lupins to improve semen quality

PRE – SALE INSPECTION

The rams will be penned and available for inspection from 9.00 am.

The pen size allows access for closer inspection if required.

LOT ORDER

The Suffolk Stud rams will be sold first, then the White Suffolk Specially Selected rams, followed in age order by the White Suffolk flock rams and the Suffolk flock rams.

CAPPED PRICE CONDITIONS.

All rams are available to be purchased for stud and/or flock use.

The minimum opening bid for a stud ram purchase will be \$2000.

The maximum price that a flock ram will be sold to is \$1200.

If there is no opening bid of \$2000 then the lot will be sold at the highest price up to \$1200.

SEMEN RETENTION

Oakwood is retaining a semen interest in all rams offered for within flock use (unless stated otherwise). The collection of semen is to be done at the convenience of the purchaser and at the cost of Oakwood.

PHONE BIDDING.

Phone bidding will be available on the day by contacting

Landmark Naracoorte 08 87621200 or Richard Jennings 0428616554.

AGENTS

Contact your local Landmark agent or the Naracoorte office 08 87621200

AGENTS REBATE.

6% rebate will be provided to any outside agents introducing buyers in writing prior to the sale and attending the sale.

DELIVERY

Delivery is at the fall of the hammer.

Delivery can be arranged for single buyer purchases of 5 or more rams.

LAMBPLAN

Understanding ASBV's and Indexes

Australian Stud Breeding Values are an estimate of an animal's true breeding value based on pedigree and performance record figures. They are the unit measurement Lambplan use to analyse animals and essentially a projection of how an animal's progeny will perform for a range of traits. Indexes are designed to meet different breeding objectives. They are simply a guide to assist in selection however breeders should first consider their breeding objectives. This will involve considering your current ewe base, the environment they are run in and the target market for their progeny.

Birth weight (BWT): Estimates the genetic difference between liveweight at birth (kgs) - the lower the value the lower the birth weight.

Weaning Weight (WWT): Estimates the genetic difference in liveweight at 100 days - the higher the value the faster the progeny will grow to weaning.

Postweaning weight (PWT): Estimates the genetic difference in liveweight at 225 days - a higher value PWT ram will produce faster growing progeny to 6 months of age.

Fat (PFAT): Estimates the genetic difference in GR fat at 45kg liveweight - the more negative the value the leaner the progeny will be.

Eye Muscle Depth (PEMD): Estimates the genetic difference in eye muscle depth at the C site in a 45 kg liveweight animal - rams with positive values will have more muscle in the high value areas and better overall carcass shape.

Worm Egg Count (PFEC): Estimates the genetic difference in worm egg burden at 225 days - the lower the value indicates that the progeny will be more resistant to developing a worm egg burden.

Carcass Plus (C+): Is a combination of post weaning weight, fat, eye muscle depth traits and is a desired gains index.

Lamb 2020 (L2020): same as Carcass plus but incorporates birthweight and worm egg count, the aim being to moderate birth weight and increase worm resistance. This is a \$ index so a ram with an index of 115 will, on average, sire lambs that are worth \$3 more per head than a ram with an index of 110. **At \$5more/lamb, a ram producing 300 lambs in his lifetime will produce an extra profit of \$1500.**

LEAN MEAT YIELD AND EATING QUALITY

The Lamb Eating Quality index is targeted at producers interested in improving meat eating quality of their prime lambs while continuing to improve production traits in a balanced way. Eating Quality is an important trait to consider. Oakwood is now using the Lamb Eating Quality Index to select Rams for future industry requirements.

Lean Meat Yield (LMY): This is a measure of the commercial yield of lean meat as a percentage of hot carcass weight - the higher the value the higher the dressing %.

Shear Force (SF5): This is a measure of the force required to cut through a loin muscle of a lamb after 5 days of aging and recorder in kilograms of force. The more negative the SF5 value the more tender the muscle.

Lamb Eating Quality (LEQ): is a combination of L2020, LMY and SF5 traits and the higher the value the higher the lean meat yield and taste.

Glencraig 15406 purchased for record price \$11000 at Glencraig Dispersal Sale.
